SPRINT THREE PLAN

Designated Driver

Team Roles / Tasks

- Anthony Nguyen (Developer)
- Ali Alkaheli (Developer)
- Zeno Mathew Nanon (Developer)
- David Ip (Developer)
- Katerina Chinnappan (Scrum Master)
- Oscar Castro (Developer)

Project Title: Designated Driver Service

Project Owner (Sponsor): Todd Anderson

Project Owner (in CS117): Ali Alkaheli

Scrum Masters (Sprint 3): Katerina

Sprint 3 Start Date: 05.15.2018

Sprint 3 Completion Date: 05.29.2018

GOAL: Communication between driver and user, implement notification system

★ **USER STORY 1 (13):** As a Developer, I want to add a external chat system(something like Discord) for the driver and user.

- Task 1: When a rider and driver agree on the request -- link them with an external chat app like discord.
- Task 2: once the ride is over, make sure they cannot contact each other for security purpose

★ **USER STORY 2 (13):** As a Developer, I want to be able to notify the driver for requests. User gets notification once the driver accepts.

- Task 1: Notify the driver that he has a request from some rider. Something like a button where he can accept the request.
- Task 2: Once the driver accepts the request, send a notification the rider that he has a driver now.
- Task 3: The driver and user need to be paired.

★ **USER STORY 3 (13):** As a Developer, I want to charge the user the right amount and display the last four digits of the users card in the home page.

- Task 1: Get the total amount for the trip and charge the user that amount to the card of their choosing.

- Task 2: Display the last four digits of the card the user will be paying with below the “Trip Total” in the home page. The last four digits will change whenever the user changes or adds a card.
- Task 3: Allow the user to enter only numbers (decimal). Write a custom directive for this.

Task Listing:

- Notify driver for rider request
- Notify rider for driver accepts request.
- Understand product [release plan]
- Link driver and user

Initial Task Assignment:

- Katerina
 - Scrum Master
 - Get the total amount for the trip and charge the user that amount to the card of their choosing.
- Oscar
 - Display the last four digits of the card the user will be paying with below the “Trip Total” in the home page. The last four digits will change whenever the user changes or adds a card.
- David
 - Link Driver Partners
- Zeno Mathew Nanon
 - Notify the driver that he has a request from some rider. Something like a button where he can accept the request.
- Ali
 - once the ride is over, make sure they cannot contact each other for security purpose
 - When a rider and driver agree on the request -- link them with an external chat app like discord.
- Anthony
 - Link Driver Partners
